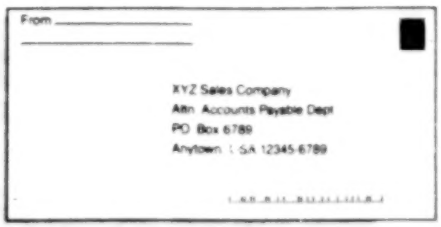
ZIP+4 CODES . . . WHY THEY ADD UP FOR BUSINESS MAILERS.

ZIP + 4 coding is a logical step into the future.

Automation has arrived for the Postal Service, just as it has for other major businesses and industries. Automation is the Postal Service's key to addressing tomorrow today. And, to capture the maximum benefits available from automation, the Postal Service is taking off into the future by introducing the ZIP + 4 code.

Processing ZIP + 4 coded mail on our automated equipment will benefit the Postal Service and mailers through a system which is more accurate and cost-effective than either mechanized or manual sorting operations. This means automation and the use of ZIP + 4 codes will reduce postal costs and help hold down the postage rates paid by business and other mailers.



ZIP + 4 coding offers many benefits to business mailers.

Business mailers generate the majority of all mail volume, and much of it can be processed on the new automated equipment. Through customer contacts and the distribution of postal brochures such as Notice 221, *Addressing for Automation*, the Postal Service is stressing the importance of business mailers preparing their First-Class letter mail in a manner which is compatible with automated mail processing.

When ZIP + 4 codes are added to letter-size First-Class Mail,® the automation benefits of accuracy and efficiency are greater, *and* business mailers receive other benefits as well.

- Postage discounts are given to qualifying ZIP + 4 mailings. Non-presorted ZIP + 4 mailings of at least 250 pieces receive a discount of 0.9 cents per piece. (That's $9 per thousand qualifying pieces.) Presort ZIP + 4 mailings of at least 500 pieces receive a discount of 0.5 cents for each presorted piece ($5 per thousand qualifying pieces) *in addition* to the current Presort discount. Residual non-presorted ZIP + 4 pieces in the mailing receive the 0.9 cent discount.
- Mailers who enter carrier route presorted ZIP + 4 mailings receive no additional ZIP + 4 discount on carrier route pieces, but the carrier route pieces *can* be counted toward the minimum piece requirements, and all qualifying residual pieces in the mailing will receive the appropriate ZIP + 4 price incentive.
- Mailers can use the Postal Service's ZIP + 4 address files to edit their lists and eliminate costly duplicate addresses or correct those which are incomplete.
- Mailers can also use ZIP + 4 codes to enhance their marketing demographics.
- Mailers who receive large volumes of First-Class Mail may receive a number of unique ZIP + 4 codes they can assign to various departments or company functions (such as credit departments, business offices, customer services functions and others). The assignment of these unique ZIP + 4 codes can make in-house processing of incoming mail more efficient.

USPS provides ZIP + 4 address list conversion services without charge.

The Postal Service is offering a number of programs to help in the conversion process.

Mailers who store their addresses in mainframe computers can obtain at no charge the Postal Service's National or State ZIP + 4 Directory tapes. To order the tapes, ask your Postmaster or Commercial Accounts Representative for Form 5600, *ZIP + 4 National/State Directory Computer Tapes Request* or use the order form on page A-11. A set of technical notes and instructions for developing the matching software accompanies the tapes.

Mailers who have small lists or who manually maintain their lists can submit hard copies of their lists to the Postal Service and the ZIP + 4 codes will be added at no charge. To apply for this service ask your Postmaster or Commercial Accounts Representative for Form 5601, *ZIP + 4 Address List Coding Order Form* or use the order form on page A-13.

Mailers whose address lists are available on 3½", 5¼" or 8" diskettes can submit a copy of their diskettes to the Postal Service. The ZIP + 4 codes will be added at no charge and the mailer will avoid the necessity of manual entry of the ZIP + 4 Codes into his files. To apply for this service, use the order form on page A-15 or ask your Postmaster or Commercial Accounts Representative (CAR) for Form 5603, *Request for ZIP + 4 Coding of Address Files on Diskettes*.

Printed ZIP + 4 code state directories are available for purchase at a nominal cost by mail

BEST COPY AVAILABLE

order only. Ask your Postmaster or Commercial Accounts Representative for Form 4242, *ZIP + 4 Code State Directory* Order Form or use the order forms on pages P-3 and/or P-4 in the front of this directory.

Many commercial firms also offer ZIP + 4 address conversion assistance.

In addition to Postal Service assistance, a number of private firms perform ZIP + 4 conversions, provide matching software for customers wishing to do their own conversions, and provide other related assistance to mailers for a fee. Some firms also can provide a ZIP + 4 file on microfiche and/or microfilm for a fee. The Postal Service, on a non-endorsement basis, has compiled a free directory of these firms. Ask for Publication 148, *Directory of ZIP + 4 Coding Services*.

ZIP + 4 codes permit more efficient sorting of the mail.

The expanded ZIP Code® is called the ZIP + 4 code because it adds four new numbers to the existing five-digit ZIP Code. Those first five numbers identify an area of the country and the delivery office to which the mail is directed. Mail delivery, however, requires a still finer sortation. So, to give our automated equipment information with which to sort mail to this finer degree, we've added a hyphen and four new digits. These four new numbers will allow our equipment to identify a smaller portion of the delivery area, in effect, permitting "fine tuning" of mail sorting operations.

Here's what the ZIP + 4 code "tells" our automated equipment. The first two new numbers denote a delivery *sector*, which may be several blocks, a group of streets, several office buildings or a small geographic area. The last two new numbers denote a delivery *segment*, which might be one floor of an office building, one side of a street, specific departments in a firm, or an individual or group of post office boxes.

ZIP + 4 coding adds up to a better Postal Service.

The ZIP + 4 program is an investment in the future, and that's how it should be approached by any mailer. The use of ZIP + 4 codes on machinable, OCR-readable First-Class letters and cards will enable the Postal Service to gain the maximum benefits from automation. *In return*, mailers will receive more reliable, consistent and accurate mail service. Moreover, the ZIP + 4 discounts will return conversion costs to volume mailers who make the *voluntary* conversion to ZIP + 4 codes. And, since use of ZIP + 4 codes will enable the Postal Service to improve its productivity while reducing its costs, ZIP + 4 coding also offers greater future rate stability for all mailers.

When business mailers use the voluntary ZIP + 4 codes, the payoff is improved mail service through fewer handlings, fewer sorting errors and improved reliability *plus* more stable and lower postage rates.

For more information about why ZIP + 4 coding adds up for business mailers, contact your local Postmaster or Commercial Accounts Representative today.

ADDRESSING FOR AUTOMATION.

ADDRESSING FOR THE AUTOMATED MAIL SYSTEM

This notice will help you address your mail correctly so that the optical character readers (OCRs) and bar code sorters (BCSs) can process your mail in the most accurate and efficient manner currently possible. You'll find that addressing for automation isn't complicated. It's really just good common addressing sense. You are probably following all of the addressing rules already. But just in case you aren't certain, here are the basics to keep in mind.

MAIL PIECE

Size—In order to be processed by optical character readers, mail pieces (postcards and envelopes) must be rectangular and must fall within the following size standards.

Post Cards

Minimum	*Maximum*
Height 3½ inches	Height 4¼ inches
Length 5 inches	Length 6 inches
Thickness .007 inch	Thickness .25 inch

Envelopes

Minimum	*Maximum*
Height 3½ inches	Height 6⅛ inches
Length 5 inches	Length 11½ inches
Thickness .007 of an inch	Thickness ¼ of an inch

The aspect ratio of mailpieces (length divided by height) should fall between 1.3:1 and 2.5:1.

Of course you can mail larger or thicker items, but they must be processed by less efficient means and you may have to pay a surcharge.

Paper Stock—At present, bar codes printed on mail pieces by the optical character readers do not print clearly on materials such as spun olefin and certain recycled paper. Therefore, envelopes made of these materials cannot be processed by OCRs.

WHERE TO ADDRESS

Address Area – In order to ensure that the OCR reads the mailing address and not the return address (or information not pertaining to the address), an OCR read area has been identified. All characters on the last line of the address – the post office, state, and/or ZIP + 4 code – must be located within the OCR read area, the boundaries of which are indicated below. (We prefer that you place the other lines of the address in the OCR read area also.)

Sides of rectangle	1 inch from left and right edges
Bottom of rectangle	⅝ of an inch from bottom edge
Top of rectangle	2¼ inches from bottom edge

Window Envelopes – Locate the window so that the entire address is visible at all times. Therefore, to avoid the possibility of having the address partially obscured if the insert shifts within the envelope, *at* least ⅛ of an inch clearance (¼ of an inch is preferred) should be left between the window edges and the bottom and both sides of the address throughout the insert's full movement. Remember to allow space in the window to accommodate the additional five character spaces for the ZIP + 4 code (hyphen and 4 numbers).

Line Slant – Take care to ensure that the address lines are parallel with the bottom edge of the mail piece. (This is especially important if you are using address labels.) Lines should not slant more than five degrees from the bottom edge.

NON-ADDRESS INFORMATION

Company logos, advertising copy, and any other markings not part of the delivery address may be placed anywhere on the mail piece provided they are: (1) *NOT* in the bar code read area and (2) *NOT* in the OCR read area positioned below the delivery address (street) line.

PRINT QUALITY AND COLOR

Print Quality – Print quality is the most important factor in addressing for Optical Character Reader processing. Make sure type is clear and sharp; try to avoid smudged characters and broken or faded strokes.

Color – Black ink on a white background is preferred. However, color combinations may be used which provide a print contrast of at least 40%. Reverse color printing (light characters on a dark background) is not OCR readable. In addition, the address background should be uniform (halftone screenings of less than 400 dots per inch may cause interference).

CLEAR AREAS

OCR Read Area – To ensure the optical character reader can identify the bottom line of the address, nonaddress printing or marks of any kind should not appear within the OCR read area below the delivery address line (the line containing the street address, PO Box, or route number). This includes attention lines, account numbers, tic marks, underlines, boxes, computer punch holes, colored borders, and similar nonaddress information. If such information must be part of the address block, it should be placed on the line directly above or below the name of the recipient. Otherwise, it should be relocated to other areas of the mail piece not designated as clear areas.

Bar Code Read Area – After the OCR has read the bottom line of the address, it will print a bar code representing the ZIP + 4 code on the bottom of the mail piece for use in further electronic processing. Therefore, the area in which the bar code will be printed – the bottom right corner of the mail piece, ⅝ of an inch high and 4½ inches wide – must remain clear of all printing. (This restriction does not apply to business and courtesy reply mail preprinted with ZIP + 4 bar codes since the optical character readers detect and automatically sort this mail using this preprinted ZIP + 4 bar code).

FORMAT, TYPE STYLE, SPACING

Address Format—The address must be TYPEWRITTEN or MACHINE PRINTED in order for the optical character reader to recognize letters and numbers.

If possible, the post office, state, and ZIP + 4 code should all appear on the bottom line. If space will not permit this, the ZIP + 4 code should be printed on the last line immediately below the post office and state and be positioned flush with the left edge of the address block.

Capital letters and a uniform left margin are preferred; all punctuation should be omitted. Standard two-letter state abbreviations should be used.

BEST COPY AVAILABLE

Foreign Addresses - Mail addressed to a foreign country must have the full name of the post office and country of destination printed in capital letters. The postal delivery zone (if any) should also be included. The country name must be the only information on the bottom line of the address.

Type Style and Spacing – The OCRs read most typewritten and other machine print styles. However, type styles such as script, italic, artistic, or other unusual or foreign type styles and certain dot matrix styles (in which the dots do not touch) cannot be processed on the Optical Character Reader.

- Sufficient space should be left between address lines so that characters from one line are not too close to characters on another line. Line spacing within the address should be uniform.
- Address lines per inch: 6 are preferred; 8 maximum (capital letters should be used)
- Space between address lines: 0.04 inch is preferred; 0.025 inch is the minimum for OCRs
- Characters should not be too close together, should not touch, and should not overlap.
- Characters should not be too wide or too narrow.
- Characters (including spaces) per inch: 10 to 12 are preferred; 7 to 12 is the range for OCRs
- Character height: .08 to .20 inch (8 pt. to 18 pt.)
- Character height to width ratio: 1:1 to 1:7:1
- 1 to 2 spaces between words are preferred.
- 1 to 2 spaces between the state and ZIP + 4 code are preferred. (The ability of the optical character reader to recognize the ZIP + 4 code as part of the address is diminished with each additional space after 2.)

Publication 25, *A Guide To Business Mail Preparation*, contains more detailed technical information on preparing your mail for optical character reader processing. You can obtain a copy from your postmaster or commercial accounts representative. They will also be glad to help you with any questions you may have about ZIP + 4 coding and the new automated mail processing program.

If, after comparing your mail pieces with our guidelines for optical character reader processing, you are still unsure about certain envelope designs or addressing characteristics, ask your postmaster or CAR to have samples of the mail tested for "OCR readability." A report of the test results will be returned to you citing precisely what, if any, changes are needed for successful automated mail processing.

DIRECTORY OF ZIP+4 CODING SERVICES.

The ZIP + 4 Coding Process

Before beginning, you should make a cost-benefit analysis to determine which of the available options is the most economical for your business. There are five coding methods.

Your own computer software: The Postal Service will provide you the ZIP + 4 National/State Directory on computer tape at no charge. You can obtain the tape in a variety of formats and densities by using the order form on page A-11. Once you have obtained the tapes and the explanation handbook, you can have your own data processing staff develop the software to match your address records with the correct ZIP + 4 codes. Development of your own software is probably the most expensive method for updating address files, but many large firms prefer it to the other methods because it allows for more control of the matching procedure and ensures the security of the address records.

Vendor supplied software: A number of companies lease or sell matching software to computerized mailers. This allows you to perform ZIP + 4 address matching without the need for extensive in-house data processing and development expenditures. Many firms with larger address files are choosing this method of ZIP + 4 coding.

Service bureaus: Several companies provide ZIP + 4 address matching service for a fee to any mailer whose address lists can be provided on magnetic tape. The mailer simply sends his computerized address list to a service bureau where the matching with ZIP + 4 is accomplished. After processing, the service bureau returns the address file to the mailer with ZIP + 4 codes appended. Many firms with smaller address lists or lists that are relatively stable are choosing this inexpensive method.

Manual List coding: Mailers who do not wish to use the aforementioned computerized methods can use any of the following options for coding and file maintenance:

- ☐ Using a microfilm or microfiche directory of ZIP + 4 codes. Firms offering these microform directories and readers are listed on page A-7.
- ☐ Using printed directories of ZIP + 4 codes which the Postal Service sells on a state by state basis. See the order form on page P-3 in the front of this directory.
- ☐ Using the Postal Service's ZIP + 4 manual list coding service. Mailers who do not maintain addresses on mainframe computer systems can submit to the Postal Service hard copy lists containing no more than 5,000 addresses for addition of ZIP + 4 codes. *This service is available at no charge.* There is no minimum address quantity requirement. Use the order from on page A-13.

Diskette Coding:

- ☐ Address lists submitted on *diskettes* will be encoded with ZIP + 4 codes by the Postal Service at no charge. Diskettes must contain at least 350 addresses. There is presently no upper limit on the quantity of addresses that may be submitted on diskette. Contact your local commercial accounts representative or postmaster for details if you are interested in using the service or use the order form on page A-15.

A more complete discussion of the ZIP + 4 matching methods is contained in Publication 149, *A Manager's Key to ZIP + 4 Coding*, available through your postmaster or commercial accounts representative.

ZIP + 4 Coding Services

This directory is designed as a reference guide for mailers who are considering the use of outside resources for the ZIP + 4 application. The material is provided solely as a service to our customers. The Postal Service does not endorse any of the vendors and cannot warrant any of the products offered by the firms in the listings. The mailer, of course, should exercise normal business prudence in preliminary testing of the vendor's product and in evaluating the vendor's resources for technical support before making a decision in the matter.

The pages that follow include two alphabetical listings of the vendors, or service bureaus, which offer ZIP + 4 coding services. The first listing, beginning on page A-7, provides the vendors' firm names and identifies which of the following ZIP + 4 services each vendor offers:

- ☐ Installation of ZIP + 4 matching (ZIP + 4 Coding) software,
- ☐ ZIP + 4 matching of address files on magnetic tape,
- ☐ ZIP + 4 directories on microfilm or microfiche.

The second listing, beginning on page A-8, lists the vendors' firm names along with their mailing address, telephone number and contact name.

ORDER FORM FOR ZIP+4 HARDCOPY ADDRESS LIST CODING.

Adding ZIP + 4 Codes

If you have small address files containing not more than 5,000 addresses, which are not stored on computer, you can submit those mailing lists to the Postal Service to have ZIP + 4 codes added. Corrections will also be made to five-digit ZIP Codes, spelling of street and city names, and state abbreviations.

A computer printout showing both the submitted address and the ZIP + 4 coded address will be returned to you in about three weeks after your original list is received.

No Charge For Coding

ZIP + 4 coding service is provided to you at no charge and all lists will be processed in strict confidence. Your original lists will be returned.

Other Important Facts

- Manual encoding is expensive and inefficient for large lists. You must physically add coding changes into your address file which is a very labor intensive operation.
- For a list of 5,000 or more addresses, coding onto magnetic media by a service bureau is recommended.
- Your addresses are normally entered into the Postal Service's ZIP + 4 matching system just as they appear on your list. Operators will not enter personal names, nor will they enter keyline, account or other code numbers.
- Operators do enter the names of firms, professionals, buildings, schools, institutions and agencies.
- Foreign, incomplete or illegible addresses will be skipped.
- The computer printout you receive will contain footnotes that explain why a ZIP + 4 code could not be determined.
- Footnotes will also identify other corrections to your addresses. This helps to improve the overall quality of the address list you submit.
- The more accurate and complete your address list is, the better the ZIP + 4 code match rate.
- Careful attention is paid to maintaining the list sequence as you send it. Be sure your firm name and address is on each page and the pages are numbered consecutively.

ZIP + 4 Coding Alternatives

Before preparing your list, be sure you are using a matching process that is the most compatible with your file maintenance system.

If your address list can be submitted on diskettes instead of hard copy, you would find it particularly

advantageous to submit *diskettes* for coding because you will avoid the labor costs of manually entering each ZIP + 4 code into your address file. See page A-15, *Order Form for ZIP + 4 Coding of Address Files On Diskettes*.

Ask your postmaster or postal commercial accounts representative for a copy of Publication 149, *A Manager's Key to ZIP + 4 Coding*, which explains other options you may want to consider.

If you have any further questions, contact your local post office or call the Address Information Center in Memphis, TN. The toll-free telephone number is (800) 238-3150.

Preparation Requirements

Address lists must conform to these specifications.

- To facilitate efficient and accurate ZIP + 4 address coding, each list must be machine printed (i.e., by typewriter, word processor, line printer, commercial printing, stencil printing, etc.) and submitted on sheets of paper no larger than 11" by 15" and no smaller than 5" by 8".
- To help correctly code your address list, each address must be complete. As an example, include number of the dwelling, street name or number on which the dwelling is located, city and state. When appropriate, include other specific information such as suite, apartment, floor, box number etc. The five-digit ZIP Code should be included, but it is not mandatory.
- Firm names must be included. Doctor's names must be preceded by "Dr." Personal names are not necessary.
- The name and address of the institution or firm, and the name of the person to whom the coded list is to be returned, must appear at the top of each page of the address list.
- Pages must be consecutively numbered.
- A space must be left between two adjacent addresses.
- To enhance the readability of the address, no more than two columns of addresses should be listed on each page.

Address Formats

The following examples illustrate various addressing formats and should be used as a guide in preparing address lists.

(PERSONAL NAMES ARE NOT NECESSARY, BUT FIRM, INSTITUTION NAMES ARE.)

WASHINGTON DC 20019-4606

6. COMMUNITY IDENTITY

MR JOSEPH DEAL
HILLANDALE
28 ELTON ROAD
SILVER SPRING MD 20903-1234

7. DUAL ADDRESS CONCEPT

There is also a dual address concept in which both a PO Box Number and Street Address may be used. The important aspect to remember when using this format is that the address where you want your mail delivered must appear on the line immediately above the City, State and ZIP Code.

Examples

	GRAND PRODUCTS INC
	100 MAJOR STREET
Mail will be delivered here	PO BOX 200
	PORTLAND OR 97207*-0200

	GRAND PRODUCTS INC
	PO BOX 200
Mail will be delivered here	100 MAJOR STREET
	PORTLAND OR 97213*-1001

*The Five Digit ZIP Code must be the correct one for the delivery address

ORDER FORM FOR ZIP+4 CODING OF ADDRESS FILES ON DISKETTES

USPS Control No. _____

For Internal Use
Control No. _____
Number Diskettes _____
Date Rec'd _____

SERVICES PROVIDED

- Validate/Correct 5-digit ZIP Codes.
- Encode addresses with ZIP+4 codes.
- A report of addresses for which we are unable to determine the ZIP+4 code will be returned with footnote comments.
- We will write over your input diskette(s) unless you provide us with blank diskette(s). Please label these accordingly.
- Allow approximately three (3) weeks for files to be returned.

ADDITIONAL SERVICES

We will provide the following services unless indicated otherwise.

1. Standardize spelling and format for:
   - A. Delivery address line (Street Name, Prefix, Suffix) ☐ No
   - B. Last address line (City, State, ZIP) ☐ No
2. Change city (Post Office) name to match 5-digit ZIP Code. ☐ No

PLEASE COMPLETE FORM BELOW AND ON REVERSE SIDE.

DISKETTE CONVERSION FORM

THE INFORMATION REQUESTED BELOW IS CRITICAL TO SUCCESSFULLY INCORPORATING ZIP+4 CODES INTO YOUR DISKETTE ADDRESS FILE. IF YOU NEED ASSISTANCE IN COMPLETING THIS FORM, PLEASE CONSULT YOUR COMPUTER SUPPLIER OR PROGRAMMING SPECIALISTS WHO CREATED THE FORMAT OF THE ADDRESS FILE ON YOUR DISKETTE(S). IF ADDITIONAL INFORMATION IS NEEDED CONTACT YOUR U.S. POSTAL SERVICE COMMERCIAL ACCOUNTS REPRESENTATIVE.

SUBMITTED DISKETTES MUST SATISFY THE FOLLOWING REQUIREMENTS:

- Number of address records submitted must be at least 350, but less than 50,000.
- Fixed Length Fields.
- Fixed Length Records.
- Diskettes must be in the "Transfer Mode" vs. "Save/Restore Mode".

☐ Check this box if both upper and lower case characters are in your file. Then box 1A, 1B and 2 on the front page must be marked **NO** for processing.

Make of Computer _____

Computer Model _____

Operating System _____

Diskette Type

Check One:	Check One:
☐ Single Sided	☐ Single Density
☐ Double Sided	☐ Double Density
	☐ Quad Density

PROVIDE INPUT DISKETTE LAYOUT:

Input Fields:	Field Length	Beginning Fixed Position	Maximum Length	Notations
Name (Optional)	_____	_____	N/A	Not required for processing.
Secondary Address Line	_____	_____	31	Firm Name, Bldg. Name, etc.
P.O. Box (if separate)	_____	_____	10	
House Number (if separate)	_____	_____	10	
Delivery Address Line	_____	_____	48	
City	_____	_____	28	
State	_____	_____	2	May be included in city field.
ZIP Code	_____	_____	5	May be included in city/state field.
Diskette Record Length	_____	(Must be Fixed)		
Number of Records	_____			

OUTPUT DISKETTE LAYOUT: (Will be in the same format and sequence as input diskette.)

	Field Length	Beginning Fixed Position
Add-On Code	4	_____

With standardization, if state is included in the city field of the input diskette, indicate here where you want the state field on the output diskette.

State	2	_____

If the 5 digit ZIP Code is included in the city/state field above and you have not requested standardizing, then you must select one of these three options and fill in the beginning fixed position:

Full 9-digit ZIP	*Check one*			*Examples*
Display Format	☐	10	_____	56789-1234
Numeric Field	☐	9	_____	567891234
Pack Format	☐	5	_____	567891234F

Note: A new 9 digit ZIP Code will be provided and no changes will be made to existing fields.

To see how well a company is managed, you don't have to look in the boardroom.

Smart management has been automating its mail.

They've been following a few simple guidelines in preparing mail, along with presorting and using ZIP+4® codes. And they've enjoyed two big advantages:

Special discounts, now adding up to more than 20%. (Last year, the average company using ZIP+4® codes saved $74,000.)

And more efficient delivery than ever before.

So now, if you want to check your own management, you know where to look.

It may be a room for improvement.

Automate your mail.

For more information, call 1-800-842-9000, ext. 240, or mail the coupon.

Please check your line of business:

☐ Insurance, ☐ Banking, ☐ Manufacturing, ☐ Securities, ☐ Utilities, ☐ Education, ☐ Retail, ☐ Service Company, ☐ Government, ☐ Publishing, ☐ Other_____

And check your yearly First-Class Mail volume:

☐ Up to 10,000, ☐ 10,001-50,000 ☐ 50,001-100,000, ☐ 100,001-1,000,000, ☐ 1,000,000+
